Description of the horizontal initiative: The ICCUF horizontal initiative was approved by Cabinet in May 2004. Its aim was to improve the capacity of law enforcement agencies to combat gun crime and smuggling and support law enforcement agencies to address information gaps on the smuggling and trafficking of firearms used in crime. The Government identified improved national collection, analysis and sharing of firearms-related intelligence and information as a priority for ICCUF. Provinces and other stakeholders with a key interest in firearms were consulted. ICCUF funding is distributed within the RCMP to the Canadian Firearms Program (CFP), Forensic Science and Identification Services, and the Criminal Intelligence Service Canada (CISC), all located within the Specialized Policing Services business line, as well as the National Intelligence Coordination Centre (NICC) within the Federal Policing business line. CBSA and PS also receive funds from ICCUF. ICCUF supports the RCMP's organizational priorities of Serious and Organized Crime and National Security, and its outcomes line up under the Prime Minister's Mandate Letter to the Minister of Public Safety and Emergency Preparedness Canada to get handguns and assault weapons off our streets.
