CSSA COMMENTARY: THE ELECTION IS COMING! THE ELECTION IS COMING!

What does this mean for gun owners? Well, a few things. It means we have an opportunity to get in front of our elected officials and express our support for our MP if they support our battle for common-sense firearm laws. If our MP does not support reasonable measures, then it's time to find the local candidate for the party that does support common-sense firearm laws and support them with our time, our talents and our treasure. It's also time for each of us to begin planning for the election. Team CSSA E-News | June 29, 2019

AIRSOFT GUNS SEIZED FROM TEENS IN ST. ALBERT

Several teenagers are not facing charges after police received a firearms complain in St. Albert on Thursday. Mounties were called to Mission Park shortly before 8 p.m. after receiving reports that people wearing camouflage and carrying rifles and handguns were in the park. Police and air one set up a containment area and arrested four teens. It was determined that the guns were airsoft guns. By Karyn Mulcahy, CTV News Edmonton - Published Friday, June 28, 2019

POLICE MAKE DOZENS OF ARRESTS IN TORONTO-AREA GANG PROBE

Toronto's Police Chief Mark Saunders says police began making arrests throughout the Greater Toronto Area today, taking 37 people into custody by mid-day with more expected later on. He says the eight-month-long investigation into the organization known as the Chester Lee gang had previously resulted in 43 arrests prior to Thursday's sweep throughout Toronto and the surrounding area. Saunders did not indicate how many charges were laid, but says investigators had seized at least 23 firearms over the course of the investigation.

SENATE VOTES TO EXTENDS GUN RIGHTS IN RURAL BRAZIL

RIO DE JANEIRO — Brazil's Senate has approved two bills expanding gun rights for residents of rural areas. The legislation that passed Wednesday would allow gun owners to carry firearms anywhere on their property and reduce the legal age of possession for rural residents to 21 from 25. People now can carry the weapons only in their homes. The bills still need to be approved by Brazil's lower house. 660 NEWS CALGARY - Article by The Associated Press Posted Jun 27, 2019 <https://www.660citynews.com/2019/06/27/senate-votes-to-extends-gun-rights-in-rural-brazil/>

TWO PEOPLE FACING 84 CHARGES AFTER GUNS AND GANGS UNIT INVESTIGATION

The investigation was launched June 12 after police were notified that the contents of a package being shipped to a home in Calgary didn't match its description. The package was examined and the item was determined to be a solvent trap, normally used for cleaning a firearm, which can easily be modified into a suppressor. Shaun Alexander Folk, 42, of Calgary, is charged with 51 offences including:

- Unauthorized possession of a prohibited firearm
- Possession of a firearm knowing it was unauthorized
- Possession of a prohibited firearm with ammunition
- Unsafe storage of a firearm
- Possession of a firearm while prohibited from doing so
- Breaching a recognizance
- Possession of stolen property over \$5,000

REAL OR FAKE? OPP INVESTIGATE SEVERAL CALLS ABOUT 'GUNS' AT PUBLIC PARKS

OPP officers are issuing a reminder for Caledon residents after police say they responded to multiple reports of young people with guns in public parks over the last few days. In every case, police say the guns were toy air guns and not actual firearms. Police say residents should be aware that the possession of any type of firearm, including a toy air gun, is strictly prohibited within the Town of Caledon with the exception of on private property. SURREY RCMP'S MESSAGE TO PARENTS THIS SUMMER

IMITATION FIREARMS: BB guns, pellet guns, and airsoft pistols can pose significant problems for both the police and the community. Since it can be difficult to distinguish the difference between a real and imitation firearm, all calls concerning a possible firearm will draw a considerable police presence. Officers respond assuming the firearm is real until it can be proven otherwise. As a result, parents should be aware that any imitation firearm is not simply a 'toy', despite its intended use. Think carefully before deciding to purchase one for your child and ensure your child clearly understands the proper use and potential dangers. Ensure you both know the legal requirements for the ownership, safe use, transportation and storage of certain types of air guns. Imitation firearms should only be used at designated areas, gun ranges, or on private land. They should also be kept out of sight and locked in a secure case to prevent misunderstandings, accidents, or thefts. For more information, visit the Canadian Firearms Program website. CBC - 'WE'RE IN A WAR AGAINST CRIME': NORTHERN ALBERTA HAMLET PLEADS FOR HELP

Terry Mills's truck sped into the yard at 3:45 a.m. MT on Nov. 8, 2018, confronting the thieves who had smashed their vehicles through the chained gate. They were there to steal gas again. Mills nudged one of the cars with his hood then ducked when he noticed the rifle poking through a window aimed at his head. The robbers sped off, but Mills and a security guard were soon speeding after a black car on the snowy highway. "That's when he started popping shots," Mills recalled. "We're on the phone with the RCMP from Lac La Biche. And I told them, they're heading their way. They should intercept him. And then I said the guy was shooting at us. The officer said 'If you shoot at him, I'm going to charge you with manslaughter.' I said I'm not shooting at him. He's shooting at us."

REUTERS - BRAZIL PRESIDENT BACKTRACKS ON LOOSER GUN RESTRICTIONS AS LAWMAKERS RESIST - SAO PAULO

Brazilian President Jair Bolsonaro on Tuesday reversed a move to loosen gun control laws by presidential decree, in a strategic retreat after lawmakers pushed back on one of the far-right leader's key campaign promises. In May, Bolsonaro signed decrees easing restrictions on importing and carrying guns and buying ammunition, which needed congressional approval to become permanent law. TOWHEY: TRUDEAU ALL TALK, NO WALK ON GUN BANS -- THANK GOD

Prime Minister Justin Trudeau's promise to ban "assault style weapons" after the next election is great news for law-abiding gun owners and target shooters in Canada. LETTER: CRIMINALS DON'T LICENCE GUNS

Re: No guns for me, thanks

This government has done absolutely nothing to curb gun violence or gun deaths by gangs and criminals with its increased background checks. They have only made it more difficult for law-abiding citizens who wish to go through the already thorough process to own a firearm so they can enjoy the sports and recreations they choose. I hope you realize criminals and gang members don't have firearm's licences, so don't get background checks! By Jeff Kraus - Jun 22, 2019

A REPLY TO GUN-CONTROL ADVOCATES

Currently, 20 states allow teachers to carry guns under a variety of rules on school property, so we don't need to guess what happens when teachers carry. Some states have had these rules for decades. Utah, New Hampshire, Rhode Island and parts of Oregon allowed all permitted teachers and staff to carry guns. In others, school boards or superintendents decided. For example, in Texas, over 300 school districts have armed teachers. After looking at all of the school shootings in the U.S. from 2000 to 2018, the Crime Prevention Research Center, of which I am the president, found two points.

- Commonly mentioned fears don't occur. No student has ever gotten ahold of a teacher's gun, nor has a teacher legally carrying a gun ever accidentally shot someone.
- Outside of suicides or gang violence in the wee hours of the morning when schools aren't in session, not one person has been wounded or killed from a shooting when armed teachers are around.

NRA'S NUMBER TWO RESIGNS, NRA SHUTS DOWN NRA TV

Chris Cox, the former head of the NRA's Institute for Legislative Action (NRA-ILA) has resigned his position. Last week, NRA CEO Wayne LaPierre placed Cox on leave and accused the man many believed to be his eventual successor of having aided in a failed “coup” attempt against LaPierre by former NRA President Oliver North. In the announcement of Cox's departure to NRA employees, LaPierre thanked Cox “for his service to the NRA.” This latest development follows the announcement by LaPierre that the NRA was shutting down production of its online streaming network, NRATV. The Outdoor Wire has also acquired a communication between the NRA and its former agency Ackerman McQueen in which the NRA's Andrew Arulanandam “demands immediate delivery of all materials by Section XLC of the Services Agreement, including all Confidential Information (as defined by the Services Agreement).” The letter also says that “if AMc damages or convert the NRA's property, or if the NRA perceives an imminent risk of the same, the NRA will pursue legal recourse.” The acrimonious parting of the ways has been accompanied by a myriad of charge, counter-charges and lawsuits between the NRA and Ackerman McQueen. WASH. POST - WE NEED TO FACE THIS HARROWING STATISTIC ON GUN VIOLENCE

MASS SHOOTINGS make news, and they linger in our collective memory. However, less-public incidents — the ones that happen at home — claim more lives, argues American University professor Rachel Louise Snyder in her new book, “No Visible Bruises.” In an average month in the United States alone, more than 50 women are fatally shot by an intimate partner, she writes. WHY THE SWISS VOTED FOR MORE GUN CONTROL – ANALYSIS

On May 19, 2019, Swiss voters approved a new set of gun control restrictions. This newly-approved gun control measure would put Switzerland’s gun control laws in line with European Union standards. Under this new law, military-style, semi-automatic weapons would be heavily restricted, while also tightening up gun registration standards. A few exemptions were made for participants in shooting sports who will still be able to nominally exercise their right to own arms without going through many more hurdles. What has made Switzerland truly exceptional among countries, is its [decentralized approach](#) to governance, which has effectively depoliticized it, unlike other traditional states in the EU and North America, which are mired in identity politics, welfarism, or militarism of some sort. Switzerland offers a pragmatic alternative that many of Europe’s budding [separatist movements](#) can look at as an example. By José Niño - June 26, 2019

FORBES - BRITAIN'S FOOLISH ADVOCACY OF THE ARMS TRADE TREATY BITES BACK

The British Court of Appeal has ruled that British arms sales to Saudi Arabia are unlawful, on the grounds that British ministers had “made no concluded assessments of whether the Saudi-led coalition had committed violations of international humanitarian law in the past, during the Yemen conflict, and made no attempt to do so.” This ruling offers further proof, if any is needed at this point, that the primary – and indeed, the only – purpose of the Arms Trade Treaty (ATT) is to constrain the Western democracies.

YACOLT DEFIES STATE GUN-CONTROL LAW WITH 2ND AMENDMENT RESOLUTION

Yacolt is the first local city or town to make a resolution against laws like I-1639, although in January the Cowlitz County Board of Commissioners approved a similar resolution. Town now at odds with the Clark County Sheriff's department, which polices Yacolt and promises to uphold the state's law. By Rick Bannan - June 25, 2019

MATHEMATICS TIES MEDIA COVERAGE OF GUN CONTROL TO UPTICKS IN GUN PURCHASES

The results of a study led by researchers at NYU Tandon School of Engineering, in collaboration with faculty at the UCLA Fielding School of Public Health and Northeastern University, are rooted in a data-driven approach that reveals causal relationships, rather than mere correlations. It is the first study to quantify the influence of news media stories on firearm prevalence. "Media Coverage and Firearm Acquisition in the Aftermath of a Mass Shooting" was published today in Nature Human Behaviour. by NYU Tandon School of Engineering - June 24, 2019 <https://phys.org/news/2019-06-mathematics-ties-media-coverage-gun.html>

THE AR-180 IS POISED TO MAKE A COMEBACK

Developed by the company as a viable competitor to the original select-fire AR-15, at the time licensed and produced by Colt, the AR-18 was also chambered for 5.56 NATO, but was vastly overshadowed by the other ArmaLite design which was adopted by the US military as the M16A1. Eventually, the AR-18 began hitting the commercial market in the United States as the semi-automatic AR-180 in 1969. **Oddly enough, this rifle comes from Canada of all places, eh! Dubbed the WK180-C and manufactured by Kodiak Defence of Windsor, Ontario,** Gear Scout got a close look at the new

rifle and had the chance to put a few rounds downrange at this year's Gat Show, held in Southern Ontario. **The WK180-C is considered an unrestricted rifle, meaning that you can buy it with just your basic Possession and Acquisition License.** By Ian D'Costa, correspondent with Gear Scout an avid outdoorsman, Ian is also a guns and gear enthusiast. GUEST EDITORIAL: 'ASSAULT' RIFLE BAN WOULD BE INEFFECTIVE

While gun control advocates condemn the AR-15 and similar rifles as the weapons of choice by mass shooters, most of these villains prefer pistols. The website Statista.com noted in April that between 1982 and February 2019, 69 mass shootings were carried out with the type of weapons that the proposed amendment would ban. But shooters used pistols 92 times over that same span. SUPREME COURT INVALIDATES PART OF LAW AIMED AT PREVENTING GUN VIOLENCE

The Supreme Court on Monday invalidated a key part of a law designed to prevent gun violence, saying it left too much leeway for judges to decide what constituted a violent crime. In a 5-4 ruling the justices said Congress was too vague when it tried to slap extra penalties on people who used guns while committing a "crime of violence." "In our constitutional order, a vague law is no law at all. Only the people's elected representatives in Congress have the power to write new federal criminal laws," Justice Neil M. Gorsuch wrote in the court's opinion. By Alex Swoyer - The Washington Times - Monday, June 24, 2019

GEOLOGIST DESCRIBES USES OF REVOLVERS TO DEFEND AGAINST BEARS OVER SIX DECADES

PHOTO CAPTION: Alex Burton, September 1977, Stewart B.C. Model 29 S&W .44 magnum on the right hip.

EXCERPT: Alexander Burton is a well known Registered Professional Geologist and Professional Engineer. He has been active in the field since obtaining his degree in Geology in 1954. He has worked professionally in Australia, numerous African countries, Canada, several Central and South American countries, China, Vietnam, Myanmar, Russia, and the United States. He obtained his first pistol, a Colt 357, with a six-inch barrel, in 1955. He holds an Authority to Carry (ATC) and an Authority to Transport (ATT) from the Canadian government, to openly carry a revolver while working in the field. The revolver must be carried openly and is to be used only to "save human life." Ammoland Inc. THE GOOD GUY WITH A GUN

EXCERPT: However, the events on Highway 69, as described, do illustrate the fallacy of taking extreme views on the gun debate. A lawful gun owner should be willing to acknowledge the senselessness of Las Vegas or Parkland and consider reasonable steps to stop a repeat tragedy. On the flip side, shouldn't those who seek tighter gun control look at the heroism on Highway 69 and see that there are an awful lot of law-abiding people who don't own guns to kill, or even for reasons of machismo, but simply to enhance their own safety?

INNOVATIVE GUN CONTROL IDEA GAINS SUPPORT

In the post-Parkland era, gun control continues to resurface in the news cycle as an issue of importance. While nearly seven out of 10 Americans want serious change in gun policy, national legislation hasn't reflected this opinion. But one innovative proposal at the state level may change the terms of the debate. A policy called **Extreme Risk Protection Order**, also known as a **Gun Violence Restraining Order** or sometimes a "red flag law," has garnered significant bipartisan support. ERPOs are currently in place in 16 states and are up for a vote in seven more. THE AR-15: AMERICA'S RIFLE OR WEAPON OF CHOICE FOR MASS SHOOTERS?

Now, the AR-15 semi-automatic rifle has shown up in the streets of Allentown in likely the worst mass shooting in the Lehigh Valley's history. Police say two AR-15 rifles and a handgun were used early Thursday morning outside Deja Vu nightclub in a shooting that injured 10 people. Rep. Mike Schlossberg and state Rep. Peter Schweyer, both Democrats from Allentown, support two bills that target certain assault and semi-automatic weapons, including the AR-15. The legislation would effectively ban the possession, purchase, transfer, use or manufacture of those weapons in Pennsylvania, with exceptions for military and law enforcement. But it would allow people who owned the weapons prior to the date of enforcement to continue doing so. U.S. SUPREME COURT RULES PROSECUTORS NEED TO PROVE VIOLATION OF GUN LAWS WAS DELIBERATE - WASHINGTON

- The U.S. Supreme Court says prosecutors must prove that people charged with violating federal gun laws knew they were not allowed to have a weapon. The government says the decision could affect thousands of prosecutions of convicted criminals who are barred from having a firearm. The court ruled 7-2 Friday in the case of a foreign student from the United Arab Emirates who took target practice at a Florida shooting range, even though he had been dismissed from the Florida Institute of Technology and was in the United States illegally. He was prosecuted under a law that bars people who are in the country illegally from having guns. H. L. MENCKEN ON GOVERNMENT & ELECTIONS

"The government consists of a gang of men exactly like you and me. They have, taking one with another, no special talent for the business of government; they have only a talent for getting and holding office. Their principal device to that end is to search out groups who pant and pine for something they can't get and to promise to give it to them. Nine times out of ten that promise is worth nothing. The tenth time is made good by looting A to satisfy B. In other words, government is a broker in pillage, and every election is sort of an advance auction sale of stolen goods." -- H. L. DANIELLE SMITH: POLITICIANS' CLIMATE-CHANGE YOWLING LEADS TO VOTER MISTRUST

As the rhetoric gets more extreme what we really need is a reality check. A new online web portal called the Climate Discussion Nexus came out with what they called a Crystal Ball Check this week. <https://climatediscussionnexus.com/> It went back to 2001 and examined what politicians were telling us computer models said was going to happen unless we took urgent action.

- Prediction: Canadian cities will experience longer and more intense heat waves. Fact: Summertime daily highs have shown no discernable change.
- Prediction: Heat waves will make air pollution worse. Fact: Air pollution has been steadily declining.
- Prediction: Sea levels on the northern coast of British Columbia will rise by up to 30 centimetres by 2050. Fact: Sea levels have barely changed.
- Prediction: Crop yields on the prairies will start declining due to increased droughts. Fact: Canola and spring wheat production are both up by more than 60 per cent.
- Prediction: There will be more frequent forest fires. Fact: The number of forest fires has gone down.
- Prediction: Water levels in the St. Lawrence Seaway will fall by up to 1.25 metres this century. Fact: Instead of being down 25 cm as predicted, it's hardly changed.

So what do politicians do when they've been proven wrong? They make even more wild predictions and declare even greater urgency.

WHAT THE ALARMISTS WON'T ADMIT, CANADA ALREADY A WORLD LEADER IN COMBATING CLIMATE CHANGE

FOREIGN MONEY CAN STILL SKEW OUR FEDERAL ELECTION, CRITICS WARN

Jean-Pierre Kingsley is pleased with many of the changes made to the Elections Act but is puzzled why the foreign funding loophole was not completely choked off. "It's a serious loophole and it's definitely something that we need to be concerned about, and if it's not a major problem then what's wrong with blocking it?" wonders Kingsley, who served as Canada's chief electoral officer for 17 years from 1990 until 2007. "We should be striving to achieve Canadian elections that are Canadian-only — end of story," said Kingsley, who was reached at his home in Ottawa on Thursday. GOLDSTEIN: ONLY ELIZABETH MAY AND MAXIME BERNIER ARE CONSISTENT ON CLIMATE CHANGE

- By contrast, Bernier speaks for those who believe there is no threat, or that it has been wildly overblown, or who believe Trudeau's statement last fall in a rare burst of honesty, that, "Even if Canada stopped everything tomorrow, and the other countries didn't have any solutions, it wouldn't make a big difference." If that's true, Bernier argues, then we should not put a knife to our economic throats for what amounts to a virtue-signalling, ineffective and futile fight against climate change in Canada. REX MURPHY: SCHEER AND TRUDEAU BOTH CONTINUE THEIR TIRESOME CLIMATE CHARADES

Scheer, just like Justin Trudeau, had to show that he, too, has a plan to meet those sacred Paris commitments. Canada's leverage over the future climate of the entire planet is incidental and trivial. We are as a toothpick among redwoods. This is acknowledged. Were we to halt this country's entire energy output, the race to eco-apocalypse that the doom-mongers say we're on would not be slowed by a week. The coal mines of India and China would see to that.

CHINA AND INDIA WILL WATCH THE WEST DESTROY ITSELF

Naïve-thinking, bordering on western suicide, believes China and India will stop using fossil fuels, led by coal. Each country understands coal is plentiful ("estimated 1.1 trillion tonnes of proven coal reserves worldwide that at current rates of production will last 150 years"), and it is scalable, reliable, cost-effective to the end user, and has the best energy density of all fossil fuels or renewables available. China is currently building hundreds of new, coal-fired power plants. To counter China, "India has 589 coal-fired power plants, they are building 446 more, bringing their total to 1,036." These figures are after both governments signed the Paris Climate Agreement, and touted their green credentials. Since the US,

Russia, China and India have the largest global coal reserves, and each country is vying for geopolitical dominance, they will continue using coal in record amounts. Energy is then a geopolitical weapon. Europe does not understand this fact.
